

```
using System;
class Exprogram
{
    static void Main(string[] args)
    {
        int a = 10, b = 5, c = 5, x;
        try
        {
            Exception ex = new Exception("Error can be at the program");
            ex.HelpLink = "http://www.Maths.com";
            x = a / (b - c);
            throw ex;
        }
        catch (Exception e)
        {
            Console.WriteLine("Division By zero");
            Console.WriteLine("Member name:{0}", e.TargetSite);
            Console.WriteLine("Message:{0}", e.Message);
            Console.WriteLine("Source:{0}", e.StackTrace);
            Console.WriteLine("HelpLink:{0}", e.HelpLink);
        }
        Console.ReadLine();
    }
}
```
